It's all about getting noticed:

You will never get a second chance to make a first impression. Your sign is just like a representative of your company. An effective sign can make or break you. A properly designed sign will create first of mind awareness, with a customer.

Take a look at your business from the outside in:

What does your sign say about your company? No matter what size business you have, your sign is important as it acts like a guidepost to guide customers to your place of business and attract the attention of new customers. If you are a new start up business, people that drive by will be attracted to stop in and try your business. Potential customers that move to your area look for local businesses that they can start visiting.

Affordable form of advertising:

Signs are a one time tax deductible expense that continue advertising your business, day after day, year after year. A properly designed, quality sign is the most effective, yet it's the least expensive form of advertising for your business. According to the U.S. Small Business Administration, the cost to reach 1,000 adults is as little as 5 cents compared to \$3.00 per 1,000 adults with newspaper advertising. Radio, T.V. and direct mail are here today and gone tomorrow. Your sign is the only advertising form that is not consumed. It is paid for once, will stay on the job for years and is a permanent fixture and an asset of the business.

Make your online and offline connection today:

If your website and signage don't match up, it makes it confusing for a potential customer. Hopefully, by having coordinated effort, a company can get messages across to ALL of its customers.
